

Spray

Package org.eclipse.sprays.sprays.requirements.actors

Use cases and actors overview

Actor	Type	Description
<code>SprayDeveloper</code>	System	The person who provides bugfixes and new Spray features.
<code>SprayBuildManager</code>	System	The person who delivers new Spray releases / update sites.
<code>DomainExpert</code>	System	The person who defines the domain meta model.
<code>DiagramEditorCreator</code>	System	The person who defines / generates the diagram editor for a given domain meta model.
<code>DiagramEditorUser</code>	System	The person who uses the generated diagram editor to create a new domain model.

Business process overview

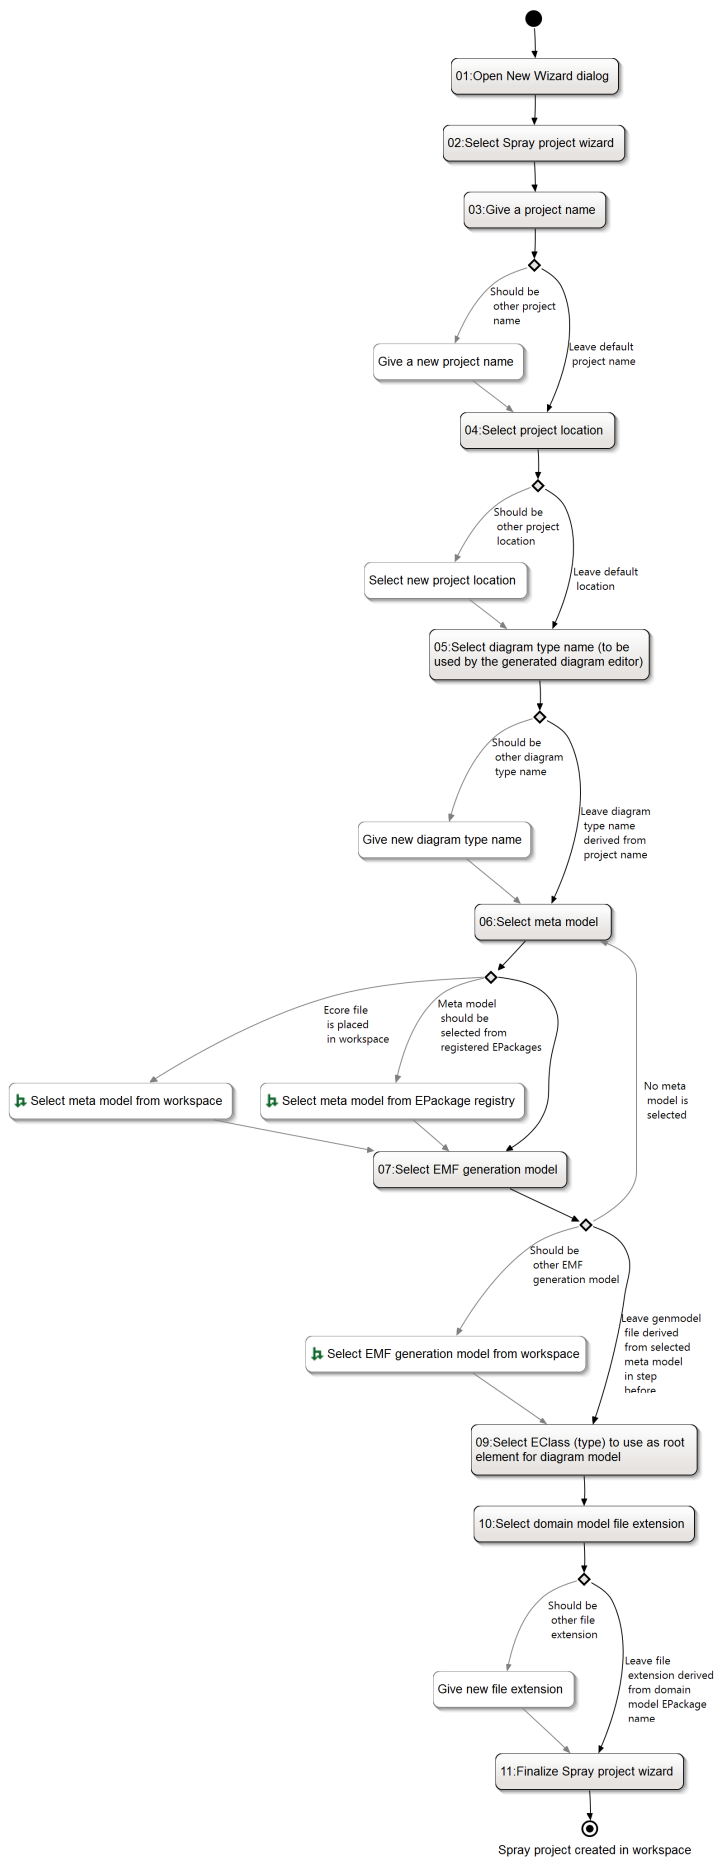

Use cases and actors overview

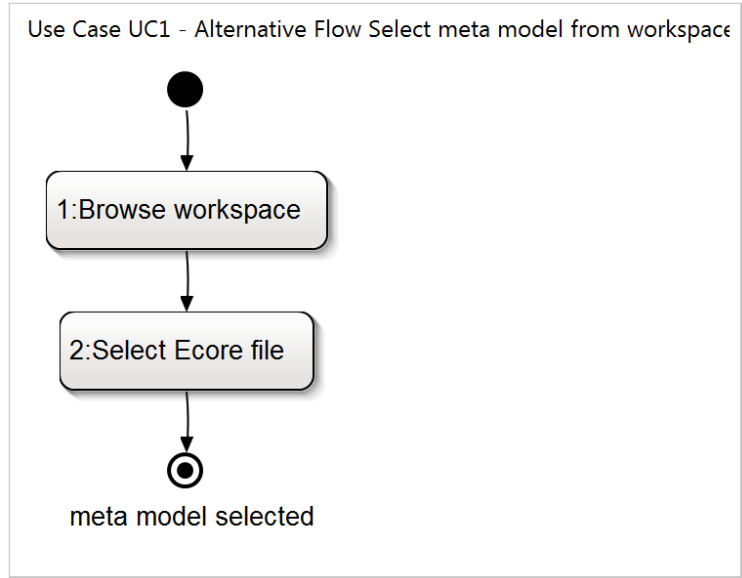

Use case UC1 Create a new Spray project

Pre conditions	Domain model exists (UC1)																						
Post conditions	Spray project created in workspace Spray project wizard is finalizable(Incomplete fields) Spray project wizard uses a unique project name(Duplicate project name) Spray project wizard uses a valid project name(Invalid project name) genmodel file selected(Select EMF generation model from workspace) meta model selected(Select meta model from workspace, Select meta model from EPackage registry)																						
Actors	DiagramEditorCreator																						
Screens	Workbench.emptyWorkbench , Workbench.projectWizardComplete , newWizardDialog.projectWizardSelection																						
Requirements	org.eclipse.spraysRequirements.issues.issue0021																						
Basic flow	<table> <tr> <td>01</td><td>Open New Wizard dialog Screen: Workbench.emptyWorkbench</td></tr> <tr> <td>02</td><td>Select Spray project wizard Screen: newWizardDialog.projectWizardSelection</td></tr> <tr> <td>03</td><td> Give a project name Screen: Workbench.projectWizardComplete → If Should be other project name: Give a new project name → Continue if Leave default project name </td></tr> <tr> <td>04</td><td> Select project location Screen: Workbench.projectWizardComplete → If Should be other project location: Select new project location → Continue if Leave default location </td></tr> <tr> <td>05</td><td> Select diagram type name (to be used by the generated diagram editor) Screen: Workbench.projectWizardComplete → If Should be other diagram type name: Give new diagram type name → Continue if Leave diagram type name derived from project name </td></tr> <tr> <td>06</td><td> Select meta model Screen: Workbench.projectWizardComplete → If Ecore file is placed in workspace: Alternative Select meta model from workspace → Continue with step 07 → If Meta model should be selected from registered EPackages: Alternative Select meta model from EPackage registry → Continue with step 07 </td></tr> <tr> <td>07</td><td> Select EMF generation model Screen: Workbench.projectWizardComplete → If No meta model is selected: → Continue with step 06 → If Should be other EMF generation model: Alternative Select EMF generation model from workspace → Continue with step 09 → Continue if Leave genmodel file derived from selected meta model in step before </td></tr> <tr> <td>09</td><td> Select EClass (type) to use as root element for diagram model Screen: Workbench.projectWizardComplete </td></tr> <tr> <td>10</td><td> Select domain model file extension → If Should be other file extension: Give new file extension → Continue if Leave file extension derived from domain model EPackage name </td></tr> <tr> <td>11</td><td>Finalize Spray project wizard</td></tr> <tr> <td colspan="2">End of flow with post condition: Spray project created in workspace</td></tr> </table>	01	Open New Wizard dialog Screen: Workbench.emptyWorkbench	02	Select Spray project wizard Screen: newWizardDialog.projectWizardSelection	03	Give a project name Screen: Workbench.projectWizardComplete → If Should be other project name: Give a new project name → Continue if Leave default project name	04	Select project location Screen: Workbench.projectWizardComplete → If Should be other project location: Select new project location → Continue if Leave default location	05	Select diagram type name (to be used by the generated diagram editor) Screen: Workbench.projectWizardComplete → If Should be other diagram type name: Give new diagram type name → Continue if Leave diagram type name derived from project name	06	Select meta model Screen: Workbench.projectWizardComplete → If Ecore file is placed in workspace: Alternative Select meta model from workspace → Continue with step 07 → If Meta model should be selected from registered EPackages: Alternative Select meta model from EPackage registry → Continue with step 07	07	Select EMF generation model Screen: Workbench.projectWizardComplete → If No meta model is selected: → Continue with step 06 → If Should be other EMF generation model: Alternative Select EMF generation model from workspace → Continue with step 09 → Continue if Leave genmodel file derived from selected meta model in step before	09	Select EClass (type) to use as root element for diagram model Screen: Workbench.projectWizardComplete	10	Select domain model file extension → If Should be other file extension: Give new file extension → Continue if Leave file extension derived from domain model EPackage name	11	Finalize Spray project wizard	End of flow with post condition: Spray project created in workspace	
01	Open New Wizard dialog Screen: Workbench.emptyWorkbench																						
02	Select Spray project wizard Screen: newWizardDialog.projectWizardSelection																						
03	Give a project name Screen: Workbench.projectWizardComplete → If Should be other project name: Give a new project name → Continue if Leave default project name																						
04	Select project location Screen: Workbench.projectWizardComplete → If Should be other project location: Select new project location → Continue if Leave default location																						
05	Select diagram type name (to be used by the generated diagram editor) Screen: Workbench.projectWizardComplete → If Should be other diagram type name: Give new diagram type name → Continue if Leave diagram type name derived from project name																						
06	Select meta model Screen: Workbench.projectWizardComplete → If Ecore file is placed in workspace: Alternative Select meta model from workspace → Continue with step 07 → If Meta model should be selected from registered EPackages: Alternative Select meta model from EPackage registry → Continue with step 07																						
07	Select EMF generation model Screen: Workbench.projectWizardComplete → If No meta model is selected: → Continue with step 06 → If Should be other EMF generation model: Alternative Select EMF generation model from workspace → Continue with step 09 → Continue if Leave genmodel file derived from selected meta model in step before																						
09	Select EClass (type) to use as root element for diagram model Screen: Workbench.projectWizardComplete																						
10	Select domain model file extension → If Should be other file extension: Give new file extension → Continue if Leave file extension derived from domain model EPackage name																						
11	Finalize Spray project wizard																						
End of flow with post condition: Spray project created in workspace																							

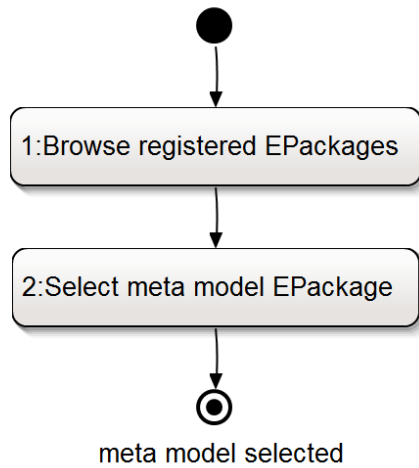

Alternative: Select meta model from workspace	1	Browse workspace Screen: Workbench.projectWizardComplete
	2	Select Ecore file
	End of flow with post condition: meta model selected	

Alternative: Select meta model from EPackage registry	1	Browse registered EPackages Screen: Workbench.projectWizardComplete
	2	Select meta model EPackage
	End of flow with post condition: meta model selected	

Use Case UC1 - Alternative Flow Select meta model from EPackage registry

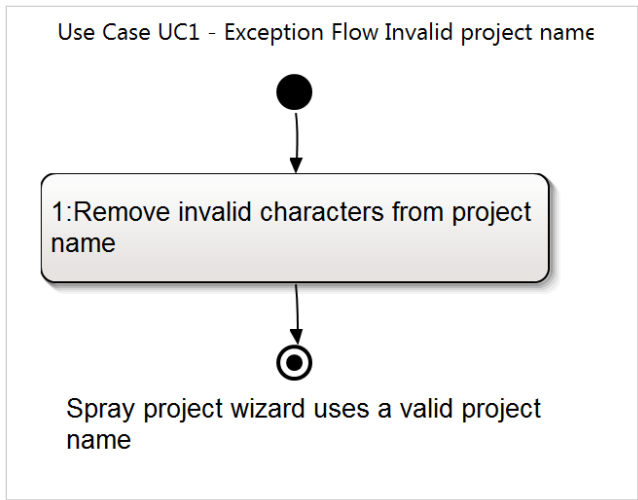

Alternative:
Select EMF
generation
model from
workspace

- | | |
|---|---|
| 1 | Browse workspace
Screen: Workbench.projectWizardComplete |
| 2 | Select genmodel file |
| End of flow with post condition: genmodel file selected | |

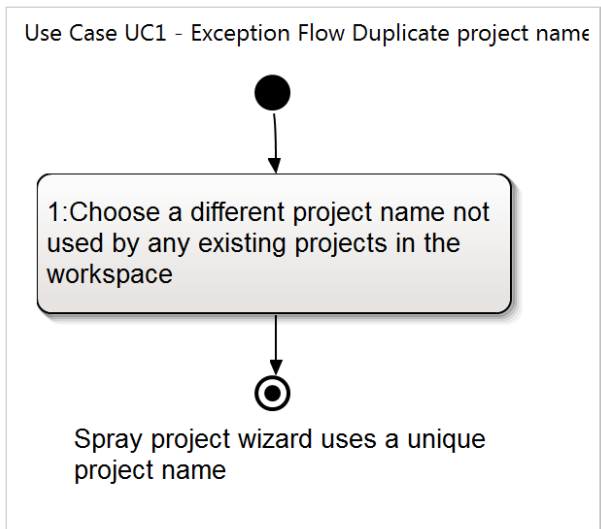

Use Case UC1 - Alternative Flow Select EMF generation model from workspace

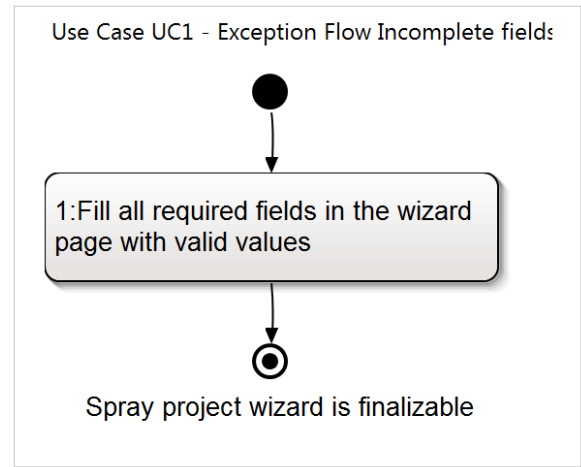

Exception: Invalid project name	If Project name contains invalid characters	
	1	Remove invalid characters from project name
	Stop of flow with post condition: Spray project wizard uses a valid project name	

Exception: Duplicate project name	If There is already a project in the workspace with the given name	
	1	Choose a different project name not used by any existing projects in the workspace
	Stop of flow with post condition: Spray project wizard uses a unique project name	

Exception: Incomplete fields	If Not all required fields of the wizard are filled	
	1	Fill all required fields in the wizard page with valid values
	Stop of flow with post condition: Spray project wizard is finalizable

User Interface Application bpmn20 – BPMN 2.0: Receipt process

Page receiptDiagram

Screens

receiptDiagramEditor

The diagram shows a receipt process flow. It starts with an 'Envelope' event leading to a task 'Leave in email in'. This task leads to a 'Circle' event, which then leads to a task 'Place in filing ca'. From 'Place in filing ca', the flow goes to a task 'Stamp all receiv'. This task leads to a task 'Separate stand', which then leads to a task 'Collect internal n'. Finally, 'Collect internal n' leads back to the 'Circle' event, completing the loop. A 'Clock' event is also shown leading to 'Collect internal n'.

User Interface Application lwc2012 – Heat exchanger

Page heatExchangerDiagram

Screens

heatExchangerDiagramEditor

The diagram shows a heating system layout. At the top left is a 'Boiler' (green circle with a flame icon). It connects via a red dashed line to a pump 'P1' (green circle with a triangle). From 'P1', the line goes to a 'Radiator' (green circle with a triangle) at the top right. Another line from 'P1' goes down to a 'Central Heating' unit (green circle with a triangle). Below 'Central Heating' is another pump 'P2' (green circle with a triangle). The system also includes several temperature sensors (green circles with 'T' and numbers 1-6) and valves 'V1' and 'V2' (green circles with a triangle). The connections are shown as red dashed lines on a grid background.

Package org.eclipselabs.spray.requirements.issues

This package contains all requirements grabbed in the Spray Google Code issues: <http://code.google.com/a/eclipselabs.org/p/spray/issues/list>

Requirements overview

 Name	Type	Stakeholder	Status	 Labels	 Use cases
issue0001	Patch for /wiki/Spray_DSL_Ideas.wiki				
		Spray developer	done	Type: Patch	
issue0002	There is a path hard coded in JavaGenFile.java.				
		Spray developer	done	Component: Code generator Priority: Medium Type: Defect	
issue0003	Downgrade version to 0.1.0				
		Spray developer	done	Component: Build Priority: Medium Type: Defect	
issue0004	Add feature projects				
		Spray developer	done	Component: Build Priority: Medium Type: Task	
issue0005	Add Maven POMs				
		Spray developer	done	Component: Build Priority: Medium Type: Task	
issue0006	Use real cross-references for rule MetaClass				
	functional	Diagram editor creator	done	Component: Language Priority: Medium Spray DSL Type: Defect	
issue0007	Enable referencing of IColorConstant instances as color				
	functional	Diagram editor creator	done	Component: Language Priority: Medium Styles DSL Type: Defect	
issue0008	Provide working SWTBot Tests for the example project				

 Name	Type	Stakeholder	Status	 Labels	
		Spray developer	done	Component: Test Examples Priority: Medium Type: Enhancement	
issue0009	Derive grammar from Xbase				
		Spray developer	done	Component: Language Priority: Medium Type: Defect	
issue0010	Include dependent artifacts into p2-repository				
		Spray developer	done	Component: Build Priority: Medium Type: Task	
issue0011	Execute Xtext generator in the build				
		Spray developer	done	Component: Build Priority: Medium Type: Task	
issue0012	Change the path handling so the Graphiti generator can be used inside an automated build				
		Spray developer	done	Component: Build Priority: Medium Type: Defect	
issue0013	Xtend: use typeof() instead of instanceof in filter				
		Spray developer	done	Component: Code generator Priority: Medium Type: Defect	
issue0014	Use @Inject instead of new operator in Xtend				
		Spray developer	done	Component: Code generator Priority-Medium Type: Defect	
issue0015	Make generation of timestamps configurable in properties file				
	functional	Diagram editor creator	done	Component: Code generator Priority: Medium Properties file Type: Enhancement	
issue0016	Trigger generator on changing the properties file				

 Name	Type	Stakeholder	Status	 Labels	
	functional	Diagram editor creator	done	Component: Code generator Priority: Medium Properties file Type: Enhancement	
issue0017	Integrate JDT Formatter				
	functional	Diagram editor creator	done	Priority: Medium Type: Enhancement	
issue0018	Task: Generate org.xspray.mm classes in the build process				
		Spray developer	done	Type: Task	
issue0019	Installation instructions				
	non-functional	Diagram editor creator	done	Component: Documentation Priority: Medium Type: Defect	
issue0020	Missing package in example from CI build				
		Spray developer	done	Component: Build Priority: Medium Type: Defect	
issue0021	Provide Xspray new project wizard				
	functional	Diagram editor creator	done	Priority: Medium Spray project wizard Type: Enhancement	UC1
issue0022	The generation gap classes are placed in src-gen, should be placed in src				
	functional	Diagram editor creator	done	Component: Code generator Priority: Medium Type: Defect	
issue0023	DSL and generator does not support defining figures containing images				
	functional		done	Priority: Medium Type: Enhancement	
	Comment Duplicate of issue0121				
issue0024	Provide Spray diagram wizard				

 Name	Type	Stakeholder	Status	 Labels	
	functional	Diagram editor user	done	Component: Code generator Priority: Low Spray project wizard Type: Enhancement	
issue0025	Could not build Xspray locally				
	functional	Spray developer	done	Component: Build Priority: Medium Type: Defect	
issue0026	MWE2 UI not installed in Spray SDK				
		Spray developer	done	Component: Build Priority: Medium Type: Defect	
issue0027	Rename projects to prefix org.eclipselabs.spray				
		Spray developer	done	Component: Build Type: Task	
issue0028	Add feature/plugin properties				
		Spray developer	done	Component: Build Type: Task	
issue0029	Add content assist for Icons				
	functional	Diagram editor creator	done	Component: UI Priority: Medium Type: Enhancement Usability	
issue0030	Generated class names should start with capital letter				
		Spray developer	done	Component: Code generator Priority: Medium Type: Defect	
issue0031	Use ImportUtil to manage imports in templates				
		Spray developer	done	Component: Code generator Priority: Medium Type: Defect	
issue0032	Cannot open generated diagram editor				

 Name	Type	Stakeholder	Status	 Labels	
		Diagram editor creator	done	Component: UI Priority: High Type: Defect	
issue0033	Move complete generator logic to o.e.s.generator.graphiti				
		Spray developer	done	Component: Code generator Priority: Medium Type: Defect	
issue0034	Allow user defined RGB color values				
	functional	Diagram editor creator	done	Component: Language Priority: Medium Styles DSL Type: Enhancement	
issue0035	Remove dependencies to Graphiti plugins from DSL plugins				
	non-functional	Spray developer	ready	Plug-in structure Priority: Low Type: Task	
	<p>Comment The o.e.s.xtext.ui plugin has dependencies to the Spray Graphiti plugins. This dependency must be removed.</p> <p>It has to be investigated if the extension point org.eclipse.xtext.ui.shared.OverridingGuiceModule can be used to achieve this.</p>				
issue0036	Provide documentation plugin				
		Spray developer	done	Component: Documentation Type: Task	
issue0037	Remove extension keyword				
	functional	Diagram editor creator	done	Component: Language Priority: Medium Type: Enhancement	
issue0038	The referenced package 'http://www.eclipse.org/xtext/common/JavaVMTypes' was imported from a different location.				
		Spray developer	done	Component: Build Priority: Medium Type: Defect	
issue0039	Use spray.target in the build				
		Spray developer	done	Component: Build Type: Task	

 Name	Type	Stakeholder	Status	 Labels	
issue0040	Error in code generation of CreateConnectionFeatures array in feature provider				
		Diagram editor creator	done	Component: Code generator Priority: Medium Type: Defect	
issue0041	Upgrade to Tycho 0.13.0				
		Spray developer	done	Component: Build Type: Task	
issue0042	Compartments				
	functional	Diagram editor creator	done	Component: Code generator Component: Language Priority: Medium Shapes DSL Type: Enhancement	
issue0043	Compilation errors in wizard-generated project				
		Diagram editor creator	done	Component: Code generator Priority: Medium Spray project wizard Type: Defect	
issue0044	Compilation errors in wizard-generated project: Couldn't resolve reference to JvmIdentifiableElement				
		Diagram editor creator	done	Component: Code generator Priority: Medium Spray project wizard Type: Defect	
issue0045	Allow usage of genmodel in workspace				
	functional	Diagram editor creator	done	Component: Language Priority: Medium Type: Defect	
issue0046	Couldn't resolve reference to Module 'org.eclipse.labs.spray.xtext.generator.SprayGenerator'.				
		Diagram editor creator	done	Component: Code generator Priority: Low Type: Defect	
issue0047	mod4j-busmod.properties projectPath not consistent usable in build and in Eclipse				

 Name	Type	Stakeholder	Status	 Labels	
		Spray developer	done	Component: Build Priority: Medium Properties file Type: Defect	
issue0048	Sign Jars				
	functional	Spray developer	open	Component: Build Priority: Medium Type: Defect	
	Comment The resulting Jars are unsigned. We have to sign them in the build. Question: Were to get a key from? We would need a valid certificate. We won't get the funding yet. --> Postponed				
issue0049	Upgrade to Xtext 2.1.0				
		Spray developer	done	Component: Build Priority: Medium Type: Defect	
issue0050	Palette contains group XXX				
		Diagram editor user	done	Component: Code generator Palette Priority: Medium Type: Defect	
issue0051	Code is not generated for example project				
	functional	Spray developer	done	Component: Build Priority: Medium Type: Defect	
issue0052	Provide possibility to set the file extensions of the businessmodel				
	functional	Diagram editor user	done	Component: Code generator Priority: Medium Type: Enhancement	
issue0053	Import org.eclipse.xtext.ecore is missing in graphiti generator				
		Spray developer	done	Component: Build Priority: Critical Type: Defect	
issue0054	Automatic code generation does not work in runtime eclipse				

 Name	Type	Stakeholder	Status	 Labels	
		Diagram editor creator	done	Component: Code generator Priority: Critical Type: Defect	
issue0055	maven clean deletes org.eclipse.sprays.xtext.jvmmodel.SprayJvmModelInferer (java class)				
		Spray developer	done	Component: Build Priority: Medium Type: Defect	
issue0056	Plugin providers injection as singleton				
	functional	Spray developer	done	Component: Code generator Priority: Medium Type: Defect	
issue0057	eContainer should be selectable for connection ends				
	functional	Diagram editor creator	open	Component: Code generator Component: Language Connection Priority: Medium Spray DSL Type: Enhancement	
	<p>Comment The from and to attribute of a connection should accept eContainer. This allows modelling connections for which one of the ends is the semantic container. E.g UML Generalization.</p> <pre>class Generalizaton : connection (width=1) [from eContainer; to general;]</pre> <p>Currently eContainer is not available, since it is an eOperation property of EObject Class and not an eStructuralFeature.</p>				
issue0058	A business element should be attachable to diagrams				
	functional	Diagram editor creator	done	Component: Code generator Component: Language Priority: Medium Type: Enhancement	
issue0059	Vertical resize of containers is ignored				

 Name	Type	Stakeholder	Status	 Labels	
	functional	Diagram editor creator	done	Component: Code generator Priority: Low Type: Defect	
issue0060	Connections should have a container Property				
	functional	Diagram editor creator	done	Component: Code generator Component: Language Priority: Medium Type: Defect	
issue0061	Custom Figures				
	functional	Diagram editor creator	done	Component: Language Priority: Medium Shapes DSL Type: Enhancement	
issue0062	Spray Editor must close when project closes				
	functional	Diagram editor creator	done	Component: UI Priority: Medium Type: Defect	
issue0063	Files generated into folder with project name				
		Diagram editor creator	done	Component: Code generator Priority: Medium Type: Defect	
issue0064	SprayUserGuide.pdf Install introduction update sites url wrong				
		Diagram editor creator	done	Component: Documentation Priority: Medium Type: Defect	
issue0065	SprayUserGuide.pdf: Choose the Diagram Type busmod				
		Diagram editor creator	done	Component: Documentation Priority: Medium Type: Defect	
issue0066	Language should use curly brackets				
	non-functional	Diagram editor creator	done	Component: Language Priority: Medium Type: Defect Usability	
issue0067	Develop Shapes DSL				

 Name	Type	Stakeholder	Status	 Labels	
	functional	Diagram editor creator	done	Component: Code generator Component: Language Shapes DSL Type: Task	
issue0068	Improve default look and feel				
	non-functional	Diagram editor user	done	Component: Code generator Generated diagram editor Type: Task Usability	
issue0069	Add aliases for Shape elements				
	functional	Diagram editor creator	done	Component: Language Priority: Medium Type: Enhancement	
issue0070	Xtext Grammar shows error Cannot find compatible feature type in sealed EClass				
		Diagram editor creator	done	Component: Language Priority: Medium Type: Defect	
issue0071	Fix alias for metaclasses				
		Diagram editor creator	done	Component: Code generator Type: Task	
issue0072	Improve formatter for the Spray DSL				
	non-functional	Diagram editor creator	done	Component: Language Priority: Low Spray DSL Type: Enhancement	
issue0073	Class is regenerated in src-gen although it has been moved to src before				
	functional	Diagram editor creator	done	Component: Code generator Priority: Medium Type: Defect	
issue0074	Properties View does not work anymore				

 Name	Type	Stakeholder	Status	 Labels	
	functional	Diagram editor user	done	Component: Code generator Generated diagram editor Priority: High Properties view Type: Defect	
issue0075	alias specification not applied to property classes generation				
	functional	Diagram editor creator	done	Component: Code generator Priority: Medium Type: Defect	
	Comment No fix needed: There is opnly one property sheet for a domain class, therefore all aliases can use the property sheet of their domain class. There is no need for a separate property sheet for an alias				
issue0076	Layout application not appropriate				
	functional	Diagram editor creator	done	Compartments Component: Code generator Component: Language Generated diagram editor Priority: Low Shapes DSL Type: Enhancement	
	Comment Won't fix: This old way of doing containers is now replaced by the compartments integrated into the shape DSL. This issue is therefore not relevant anymore.				
issue0077	Palette definition not intuitive				
	non-functional	Diagram editor creator	open	Component: Language Palette Priority: Low Spray DSL Type: Enhancement Usability	

 Name	Type	Stakeholder	Status	 Labels	
	<p>Comment When I first defined a diagram editor in the Spray DSL, I wrote something like that:</p> <pre>class State : container () { text () { name }; }</pre> <p>Then I opened the diagram editor and wondered, that there is no palette. I found out, that I have to define additionally</p> <pre>behavior { create palette "PaletteName"; }</pre>				
issue0078	References should only be allowed to containment features				

 Name	Type	Stakeholder	Status	 Labels	
	functional	Diagram editor creator	done	Component: Language Priority: Medium Spray DSL Type: Defect	
issue0079	Provide ability of semantic validation in the diagrams				
	functional	Diagram editor creator	open	Component: Language Priority: Low Spray DSL Type: Enhancement Validation	
<p>Comment In Graphiti you can use decorators, e.g. add a warn or error marker to an element in the diagram when it violates certain semantic rules.</p> <p>Spray should support such validations. The validation rules could be defined either</p> <ul style="list-style-type: none"> * in generated Java gap classes or * in the Spray DSL itself or * if the domain model is Xtext based, their Java Validator might be reused <p>For defining decorators, the <code>DefaultToolBehaviorProvider.getDecorators(PictogramElement pe)</code> can be used.</p> <p>With issue#93 <code>XtextValidationDecoratorProvider</code> is introduced. It implements the newly added interface <code>IRenderingDecoratorProvider</code>, which can be used from Spray specific tool behavior providers.</p>					
issue0080	Metamodel Cleanup
